About Us

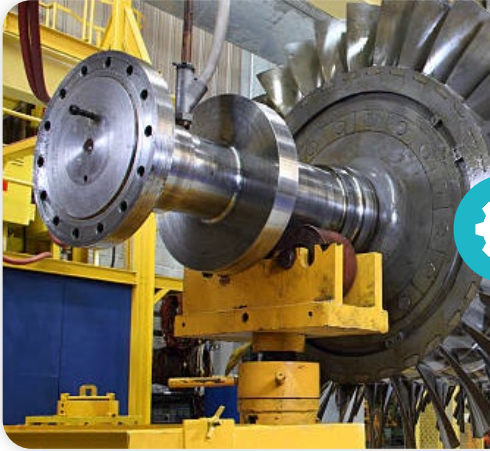

PT PLN Suku Cadang is a company established by PT PLN Nusantara Power (formerly PT Pembangunan Jawa-Bali) and PT PLN Indonesia Power (PT Indonesia Power) with share ownership of 51% and 49% respectively. PT PLN Suku Cadang is part of the PLN corporation (Persero) which is a State-Owned Enterprise which operates in the energy, oil and gas industrial sector, especially in the electricity sector in Indonesia.

The Company in every corporate action always pays attention to the principle of prudence and good corporate governance which focuses on protecting and providing added value for Shareholders and stakeholders in a sustainable manner. Compliance with laws and other regulations in the Company's governance and operations is also a concern in every decision making.

SC MART

Power Plant Material

A-to-Z Power Plant Material

1. Turbine and auxiliary
2. Generators and Auxiliary
3. Boilers and Auxiliary
4. Balance of Plant
5. Coal and Ash Handling
6. Consumable Material

Power Plant Services

One-Stop Power Plant Services

1. Repairing Services
2. Upgrading & Replacement
3. Installation Services
4. Expert Assistance Services
5. Supervisor Services
6. Troubleshooting Services
7. Logistic Management

Renewable Energy Part

Solar, Hydro, Geothermal, and
Green Hydrogen Power

1. Hydro Turbine
2. Hydrogen Solution
3. Steam Valve
4. Solar Panel / Array
5. Battery Bank
6. String / Central Inverter
7. AC Distribution
8. Transformer, etc

Our Global Partners

PLN Suku Cadang has extensive partnerships and a global business network. With these strong partnerships, we consistently deliver our best performance to provide reliable supply chain solutions for a sustainable electricity sector in Indonesia.

...and many more.

Highlight Experience in **Renewable Energy**

HIGHLIGHT EXPERIENCE: RENEWABLE ENERGY

Ibu Kota Nusantara (IKN) SPP

National Strategic Project in Indonesia as a pioneer in renewable energy generation at IKN with the latest technology in the field of Solar Power Systems.

Sulutenggo SPP

The Suluttenggo PLTS can produce up to 600 kWp of green energy with hybrid interconnection.

Temajuk SPP

This PLTS project utilizes ground-mounted PV technology with hybrid interconnection. The project demonstrates PLN's commitment to accelerate the use of green energy while simultaneously boosting economic growth in 3T regions.

Bali Rooftop SPP

Bali SPP construction consist of rooftop power plant with on-grid interconnection in 18 locations on Bali island. This project is also included in the series of activities for the G-20 Summit in Bali at the end of 2022.

SuperSUN Revitalization

PLNSC and PLN Pusharlis, participated in the revitalization of SuperSUN SPP as part of clean energy transition to strengthen the sustainability of "Sorong Ultimate for Electrifying – Surya Untuk Negeri" program, providing electrification solution in 3T regions.

HIGHLIGHT EXPERIENCE: RENEWABLE ENERGY

Indonesia's First Hydrogen Refueling Station

The inauguration of the 350 bar Hydrogen Refueling Station (HRS) in Senayan, which offers three services: hydrogen car refueling, electric car refueling, and a hydrogen center for training.

Hydrogen Fuel Cell Forklift, Cruiser, and Moped

PLN Suku Cadang successfully commissioned a 3-ton electric hydrogen fuel cell forklift, a Cruiser Hydrogen Fuel Cell Van, and a Hydrogen Fuel Moped for PT PLN (Persero). This initiative underscores PLN's commitment to promoting green hydrogen to support Indonesia's net-zero carbon target.

Electric Run 2024: Electricity from Hydrogen Generators

Providing clean energy at the PLN Electric Run 2024 event. The use of a 100 kVA Fuel Cell Generator (FCG) is the first in Indonesia and has succeeded in reducing carbon emissions by more than 14 tons of CO₂, and has become a national event with Net-Zero Emission.

Hydrogen Fuel Cell Generator Trial in Gili Ketapang

Conducting a hydrogen fuel cell generator trial on Gili Ketapang ahead of Ramadan. This step adds to the renewable energy supply using a 100 kVA Hydrogen Fuel Cell Generator (HFCG) from Muara Karang to address electricity challenges on the islands.
